

INTERNET OF THINGS/ WIFI PROJECTS

MITI IOT	Arduino Project Title (IOT Based)
1	IOT and Arduino based Home Security System
2	IOT and Arduino based Weather report information system
3	IOT and Arduino based Digital weather station
4	Cell Phone Tower Base Station Safety System using IOT technology and Arduino
5	Patient Monitoring through IOT technology and Arduino
6	Baby Incubator using IOT technology and Arduino
7	Greenhouse monitoring using IOT technology and Arduino
8	IOT and Arduino based Car theft detection system
9	IOT and Arduino based Vehicle Fuel Theft Detection System
10	IOT and Arduino based Stock Empty or Full indicator using Weight sensor
11	IOT and Arduino based Garbage & waste collection bins overflow indicator
12	IOT and Arduino based LPG weight & LPG leakage detection System
13	Door Access Security system with IOT connectivity
14	IOT and Arduino based Industrial Security system using IOT technology and Arduino
15	IOT/IOT and Arduino based LPG Leakage Detection (Monitoring) System
16	IOT and Arduino based fire detection using Smoke and Temperature sensor
17	IOT and Arduino based Industrial fault (monitoring) detection system- Overheat, LPG leakage
18	IOT and Arduino based Greenhouse Environment Monitoring and Controlling
19	Alcohol detection with vehicle controlling using IOT technology and Arduino
20	IOT and Arduino based Power Transformer Parameter fault detection
21	Toxic Gas Detection using IOT technology and Arduino
22	Temperature Monitoring of Remote place through IOT technology and Arduino
23	Smoke detection and auto intimation using IOT

24	IOT and Arduino based home automation system
25	IOT and Arduino based Solar Tracking System
26	Automatic Street light controller with IOT indication
27	IOT and Arduino based Temperature & Light Monitoring and Controlling
28	Greenhouse Robot using IOT technology and Arduino
29	IOT and Arduino based Alcohol detection using IOT technology and Arduino
30	Intelligent Helmet for Coal Miners with IOT indication
31	IOT and Arduino based Engine fault Detect
	Arduino Project Title (RFID and IOT Based)
32	RFID and IOT based Security System
33	RFID and IOT based Highway Toll Tax Collection System
34	Prepaid RFID card for Canteen management
35	RFID and IOT based Paid Car Parking System
36	RFID and IOT based prepaid card for petrol station
	Arduino Project Title (Voice Controlled)
37	Voice controlled wireless Electronic notice board using Android and Arduino
38	Voice Operated Home Appliance Control System using Android and Arduino
